In follow-up to our conversation after church today, I forward several YouTube videoclips that I recommend for your viewing.

"DAWKINS STUMPED" is a classic.

Question: "Professor [Richard] Dawkins, can you give an example of a genetic mutation or an evolutionary process which can be seen to increase the information in the genome?"

Answer: 10+ seconds of pensive silence followed by Dawkins' statement asking that the video camera be shut off. When the taping recommenced, Dawkins gave a non-responsive answer to the simple question:

<http://youtube.com/watch?v=zaKryi3605g>

You may wish to memorize that zinger question asked of Richard Dawkins for your own use in future discussions. Watching Dawkins, one is reminded of the engraving on a plaque at the U.S. Naval War College with this inscription, "Nothing is as terrible to see as ignorance in action." by Johann Wolfgang von Goethe (1749-1832).

"INHERENTLY WIND" by Dr. David Menton is now available through free streaming video here:

<http://video.google.com/videoplay?docid=-8623985676693464405#>

Availability of such useful instructional material as this suggests that diligent Disciples can now be "streaming" while the Darwin-only educrats are "screaming"; a hopeful development for the future!

Here's a shocker featuring soft tissue and preserved blood vessels in a [supposedly] 70 million-year-old t-rex fossil. Mary Schweitzer, PhD is interviewed on "60 Minutes" explaining the soft tissue and blood cells she discovered in a t-rex bone:

<http://www.detectingdesign.com/fossilrecord.html#Schweitzer>.

You'll likely find more on this and other such phenomena at icr.org and answersingenesis.org.

And there are fascinating videoclips featuring the bacterial flagellum:

http://www.metacafe.com/watch/3994630/bacterial_flagellum_a_sheer_wonder_of_intelligent_design/

http://www.youtube.com/watch?v=Ey7Emmddf7Y&feature=youtube_gdata_player

The free addenda available at www.textaddons.com is one practical way for students trapped in public schools to supplement misleading, humanist biology textbooks. You met Dr. Charles Voss, its creator on Saturday. And the Ouachita Parish School Board's Science Curriculum Policy (Adopted November 29, 2006) represents a hopeful development:

http://www.opsb.net/downloads/forms/Ouachita_Parish_Science_Curriculum_Policy.pdf

Here is an insightful 1961 quote from the Textbook Study League, Inc. of San Gabriel, CA, that warned of the ultimate result of ignoring God as the source of an individual's rights. It cautioned,

"Withhold from the children for one generation the truth of 'rights endowed by the Creator' and our Constitution could be altered and our freedom could be voted away without citizens ever knowing the cause of their slavery."

The Declaration of Independence is no mere philosophical waxing. According to pages xxix and xxx of TITLE 1 of the United States Code, it is the "First Organic Law of the United States." That's because in 1878 Congress enacted a revised version of the United States Code that included a new first section entitled "The Organic Laws of the United States." The story behind the 1878 revision of the Code is told in the introduction to political scientist Richard Cox's valuable book "Four Pillars of Constitutionalism: The Organic Laws of the United States."

The Code is Congress' official compilation of federal law; and the organic laws of the United States are the country's foundational laws. First and foremost of the four organic laws of the United States is the Declaration of Independence. Following the Declaration among the organic laws are the Articles of Confederation, the Constitution, and the Northwest Ordinance of 1787.

Here's why the Declaration of Independence is deserving of recognition as an "Organic Law" of the United States:

1. The Constitution's legitimacy depends entirely on the Declaration. If the Declaration is not an actual law, both antecedent and superior in authority to the Constitution as well as the source of authority for "we the people" to enact the Constitution, then the Constitution itself is illegitimate. Before the founders could enact their own laws, binding on anyone, including themselves, Americans had to first gain legal independence from England. They secured that under the legal auspices on the Declaration. Therefore, they could only enact such subsequent laws as were entirely consistent with the principles the Declaration set forth.

2. After legally justifying America's independence, the Declaration's principles gave legal justification for adoption of the Constitution. Federalist #43 (Madison) reasons from the "great principle of self-preservation; to the transcendent law of nature and of nature's God" in Declaration to justify the Constitution's derogation (in Article VII) of the "unanimity" requirement of Articles of Confederation that "... the Articles of this Confederation shall be inviolably observed by every State, and the Union shall be perpetual; nor shall any alteration at any time hereafter be made in any of them; unless such alteration be agreed to in a Congress of the United States, and be afterwards confirmed by the legislatures of every State." (Article XIII).

3. The computation of "citizenship" qualifications for offices of representative and senator under Article I, Sections 2 and 3 of the Constitution needed a starting point.

4. The Constitution concludes with a "Subscription Clause" (Article VII) that references the Declaration's precise adoption date: "Done in Convention by the Unanimous Consent of the States present the Seventeenth Day of September in the Year of our Lord one thousand seven hundred and Eighty seven and of the Independence of the United States of America the Twelfth." This same dating custom prevails today in government-issued certificates, etc. including my certificate to practice before the Supreme Court of the United States (SCOTUS).

Thanks for all you do!
